

Cyber Resilience Internship

CYBERFLIP SA (www.cyberflip.eu) provides state-of-the art Cybersecurity Consulting Services in the following domains:

- Cyber Security Office as a Service
- Cyber Risk Management
- Cybersecurity Framework Design and Implementation
- Cyber Resilience, Incident Response and Crisis Management
- Maturity assessments
- Compliance Services and IS/IT Certification preparation
- Technical Security Assessments
- Cyber Security Awareness Trainings

...and more to come...

Our main differentiating points are:

- We provide industry-specific services, tailored to each Organization's unique requirements, needs and budget.
- We are bridging the gap between technology and business objectives. Through our techno-economic approach, we guide the Organization to implement cost-effective security controls targeting the maximum possible ROI.
- We prioritize the recovery and response capability of the Organization through specialized Incident Response and Recovery playbooks and Crisis Communication Plans, involving all necessary functions (Tech, Business, Legal, Executive, Externals)
- We are always applying the latest international good practices combined with our professional industry experience – we have been on the other side!

The opportunity

we are looking for a student with IT or Information security to join our fast-growing team. You will gain real experience and exposure by working with major Companies on various sectors. On the same time, you will develop your personal and professional skills through training activities and coaching. If you hold an IT or Information security background and you share the same passion for Cybersecurity, we'd like to meet you.

Responsibilities

- Implementation of programs to improve Cyber Resilience through Incident Management, Crisis Management, Disaster Recovery and Business Continuity.
- Develop policies and procedures using good practices, standards and frameworks, such as COSO, COBIT, ISO2700X, NIST, ISO 22301, ISO 31000, ISO 20000 etc.
- Applying information security risk management frameworks and standards (e.g. ISO 27005, ISO 31000, COBIT 2019).
- Conduct Cyber Maturity assessments
- Apply modern security trends to address real security challenges
- Implementation of data protection and privacy programs

Requirements

- Evidence of self-motivation to continuously develop in the areas of cybersecurity
- Commitment to teamwork
- Ability to maintain professionalism and strive for high ethical standards
- Ability to write clearly, succinctly, and in a manner that appeals to a wide audience (in both Greek and English)
- Organizational and time management skills with the ability to prioritize and complete multiple complex projects under tight deadlines

Benefits

- A challenging job in a fast developing company
- Friendly work environment where you can thrive, develop your skills and see your ideas become real practice
- Build your time management skills and enhance your ability to prioritize and complete complex projects in Greece and abroad
- Continuous learning and training opportunities
- Career advancement possibilities
